

# SUN FOUNDATION

For Advancement in the Environmental Sciences & Arts

October 29, 2008

The Sun Foundation is fortunate to have Yona Lunken as both a dedicated volunteer and trained program facilitator. In the past several years, Yona has conducted two workshops for our staff and volunteers. Attendees report coming away from these workshops feeling inspired with specific ideas for how to reach our goals.

Yona is extremely professional and organized throughout the whole process of planning an event. He first works to find out your goals for a workshop and then is very helpful in helping to clearly outline a plan with reasonable expectations about what can be accomplished. He is prompt and well prepared with materials and tools to inspire creative thinking. After the program Yona provides detailed summaries of ideas generated during the session along with his expert recommendations on how to act on those ideas.

On a personal level, Yona is always courteous and easy to work with. We at the Sun Foundation highly recommend inviting Yona to help your organization achieve its goals.

Sincerely,

Robert Ericksen
